# Simple Application. Professional Results.

## APPLICATION METHOD

Achieve your desired finish using a brush, allowing for a refined and natural textured effect.

## APPLICATION PROCESS

- Apply in a single layer on a properly primed surface
- Ensure even and thorough coverage without leaving gaps
- Allow the material to settle for 10–15 minutes

## CREATING THE FINISH

The final effect is created through a subtle and artistic process:

- Gently rework the surface to redistribute the sand particles
- Use controlled or creative movements to shape the texture
- Adjust the pattern to achieve your desired visual effect

## RESULT

A distinctive sandblasted metallic finish with depth, movement, and a refined decorative character.
