FROM COLOUR SELECTION TO FINAL FINISH

SURFACE PREPARATION

PRIMING

APPLICATION

FINAL FINISH

Simple Application. Professional Results.

APPLICATION METHOD

Achieve your desired wall finish using either a trowel or a brush, depending on the effect you want to create.

APPLICATION PROCESS

- Apply the product in two layers on a properly primed surface
- The first layer must be applied with precision to ensure even, seamless coverage without gaps or overlaps
- Allow the first layer to fully dry before proceeding

CREATING THE FINISH

The second layer is where the final visual effect is created:

- Apply a thin, controlled amount of material
- Use random or deliberate movements with a trowel or brush
- Experiment with different techniques to achieve your desired texture

RESULT

A unique, decorative finish with depth, character, and a handcrafted appearance.
